SESSA FLY 42: Love at first sight

MILAN, OCTOBER 22ND, 2015

“ THERE ARE TWO TYPES OF TRAVELERS, WHO WANT TO REACH THEIR DESTINATION FASTER, AND THOSE WHO RELISH EVERY MOMENT OF THEIR JOURNEY . FOR THE LATTER, SESSA MARINE HAS CREATED A PRODUCT THAT CONTAINS MORE THAN 50 YEARS EXPERIENCE , A COCKTAIL OF MEDITERRANEAN TASTES AND STYLES, NEEDS AND FUNCTIONALITY, THUS BEING THE RESULT OF THEIR EXPERIENCE IN THE INTERNATIONAL MARKETS . ”

RICCARDO RADICE SESSA MARINE

DESIGN, HABITABLENESS AND FUNCTIONALITY TOGETHER IN ONE PRODUCT

OUTDOOR SPACES

SPACES NEVER SEEN ON A FLYBRIDGE AND IN A COCKPIT

If the Fly 40 became famous for the incredible space and the ergonomics of the cockpit and the flybridge area (winner of “boat of the year” in Italy in 2012), the FLY 42 is able to further increase this success.

Some structural parts of the flybridge have been made with carbon, in order to increase the rigidity and reduce the weight. This spacious area is rich in equipment such as: **double pilot seat**, a **big bow sunbathing areas**, strategically located to shelter from the wind, a **wide L-shaped sofa**, a **teak table for 6 people**, and a **kitchen furniture** with sink, refrigerator and grill.

Never a flybridge of these dimensions guaranteed such a **high level of liveability, concentrating, at the same time on so many elements**.

A MULTI-FUNCTION COCKPIT

Even more incredible is the **comfort** that this new cockpit offers, which has been **increased both in space and in seating capacity**. The L-shaped divan has been created for 8 people to dine at and has been conceived to be easily converted into a sunbathing area by means an additional cushion.

Furthermore, the addition of an **electric bimini** will allow the owner to be protected from the sun at any time of the day with ease.

Sessa Marine has also designed **custom furniture to enrich the stern area**. A **big BBQ, sink and chopping board** are positioned on the outside stern section of the boat, ideal for barbecue and cocktails with friends during a beautiful day at sea.

This strategic configuration allows to stay close the water, leaves the cockpit area clear for your friends to enjoy their leisure and the temping BBQ smells drift out to sea.

INDOOR SPACES

HIGH RANGE KITCHEN

The kitchen is positioned in the lower deck and is surrounded by a great lighting, rivalling much larger boat galleys.

The Fly42 galley incorporates a large 165 l refrigerator, large electric oven (Miele), countless storage lockers and ample work surface area, offering similar space and equipment to her top of the range sister, the C68.

Another innovative use of space is the area created under the stairs to position a top loading washing machine (6 kg load.)

TWO SPACIOUS AND INDEPENDENT BATHROOMS

Strong point of the lower part of the cabin is the two bedrooms and their independent toilets with a shower cubicle in each, as found in the FLY 47

SPACES AND DIMENSIONS AIDING IN A DOMESTIC LIVEABILITY

Particular attention has been made to the **dimensions of the doors and height in the cabins (about 1,90 m)**, as well as the amount of storage and functional furniture. In the owner 's cabin, the bed is equipped with integral storage, with easy access by a gas assisted base. The all new **wide hydraulic platform** is very helpful for launching of any "sea toys".

HIGH CATEGORY EQUIPEMENT

The **pilot position** has been expertly designed to offer excellent viewing of instruments both seated and standing, and the "intelligent" **side window** increases your comfort at sea.

The FLY42 contains all the design and construction solutions so important to the designer Christian Grande and the shipyard, in order to have more comfortable areas and at the same time a **feeling of "cocooning"**

Thanks to the chromatic perception of the spaces, the play of lights allowed by the wide windows, the mirrors as well as the choice of material normally presented in the bigger boats, **the Fly 42 reveals here the Italian style in all its talent**

TECHNOLOGY : IPS CHOICE

After having conceived 7 models with IPS technology , SESSA MARINE renewed its choice to equip this Fly 42 with IPS VOLVO engines, well-known for high quality and advantages such as: **reduction of Co2 emissions, fuel consumption, noise levels below 50%, exceptional maneuverability and safety, especially during mooring.** Equipped with 4-cylinder engines D4 3.7-liter common-rail, with commands for EVC, turbo compressor , supercharger and after cooler, the FLY42 will reach a **maximum speed of 32 knots** with an **average consumption of 80 l/ h at cruise speed (25/26 kn).**

Made with **vynilester resins** to ensure an excellent barrier against osmosis and multi-axial fiberglass to strength the hull laminates. The FLY42 offers considerably high security levels. Navigability, smooth on waves and sea keeping are ensured by its "V" variable hull shape

A SPACE TO LIVE WITH YOUR FAMILY

The shipyard SESSA MARINE thanks to its big experience in the production of "compact boats", became an expert in the optimization of spaces. That's why the owner on board of a 42 ft will not have the feeling of being in a tight space whether inside or out.

TECHNICAL DATAS

Overall Length - 13,10 m

EC Certifying length – 11,76 m

Beam - 3,90 m

Engine - 2 x IPS 400 (2x300 Hp / 2x221 Kw)

2 x IPS 500 (2x370 Hp / 2x272 Kw)

Max speed (IPS 500) - 36,00 kn

Draft – 0,82 m

Displacement without loading – 10.900 Kg.

Project category – B

People - n. 12

Cabins – n.2

Berths – n. 4 + 2

Toilets – n. 2

Water tank - 350 l

Fuel tank – 2 x 490 l

Black water tank – 125 l
